## EXPERIENCE

### Information Technology Analyst

#### Credit Suisse

📅 June 2022 - currently    📍 Wrocław, Poland

I am participating in the TA Graduate Program as member of a team responsible for Data Protection and Application Security. I work as a Engineer. My responsibilities are to create monitoring solutions and Access management solutions. I'm supporting internal process of blocking access outside-of-Switzerland users to Client Identifying Data

### Information Technology Analyst Internship

#### Credit Suisse

📅 March - May 2022    📍 Wrocław, Poland

During the internship I was part of a Data Protection and Application Security team as a Engineer. I learned **Powershell** and **Splunk** by implementing a continuous testing solution for process that blocked access to Client Data from outside of Switzerland.

## PROJECTS

### Hosting a website

#### Bought a domain and set up website on rented VM

Decided to try set up my own place in the internet. Also set up a personal blog there.

Used technologies:

- Debian 11
- Nginx
- **HUGO** framework

Check out my website [here](#)
